

GOOGLE PRODUCT SPECIALIST

Google Product Specialist enhances users' online shopping experience by performing in-depth research, determining product taxonomy expansion, and improving machine learning classification using highly technical internal tools and processes. It is part of a fast-paced environment, partnering closely with operations and engineering teams.

RESPONSIBILITIES

- Quickly learn and build expertise in new processes and technical applications.
- Deeply analyze data relationships to determine cause and effect of classification.
- Build product expertise on a large quantity of diverse products through thorough research and analysis of data from multiple channels.
- Review data to determine taxonomy expansion and target areas in the taxonomy which require additional training.
- Collaborate with cross-functional teams on project initiatives to enhance Google's user experience.
- Manage time effectively and adapt to frequently changing processes and requirements.

REQUIREMENTS

- Very good French & English (min C1)
- A Bachelor's degree preferred with a strong academic record. Master's degree a plus.
- Strong computer and internet navigation skills and natural comfort with technology. Ability to learn technical processes quickly.
- Other attributes:
 - adaptable
 - organized
 - intellectual curiosity
 - excellent research skills
 - analytical and problem-solving skills
 - works well both independently and with teams
 - able to perform repetitive and detailed analytical work accurately and consistently
 - capable of delivering high-quality results on tight deadlines with minimum guidance

ADDITIONAL SKILLS DESIRED BUT NOT REQUIRED:

- Scripting abilities, particularly Java, Google Apps Script, or SQL.
- Experience with online shopping.

DOES NOT REQUIRE:

- Ability to program or develop software
